PROFESSIONAL SUMMARY

Pre-final year Computer Science student (VTU, 2027) with a published research paper and international conference presentation on AI-driven mental health prediction. Hands-on experience across machine learning, web development, and database systems. Seeking a software or tech internship to contribute to real-world projects. Smart India Hackathon and SAP Hackfest participant; certified in Generative AI, Cybersecurity, and Cryptography.

EDUCATION

B.E. in Computer Science & Engineering [VTU]SEA College of Engineering and Technology, Bangalore · Expected May 2027

Relevant coursework: Data Structures & Algorithms, DBMS, OOP, Machine Learning, Computer Networks

TECHNICAL SKILLS

Languages: Python, Java, C++

Web Development: HTML, CSS, JavaScript, PHP

ML & Data: scikit-learn, NumPy, Pandas, Matplotlib, Random Forest

Databases: MySQL, MySQL Workbench

Tools: Git, GitHub, VS Code, Jupyter Notebook

Concepts: OOP, DBMS, DSA, REST APIs, Machine Learning, Role-Based Access Control

PROJECTS

AI-Based Student Burnout & Mental Health Prediction [Major Project]Bangalore · Jan 2025 – Present

- Developing an ML system to predict student burnout risk using behavioral and academic data features.
- Applying supervised learning techniques, feature engineering, and model evaluation using scikit-learn and Pandas.
- Designing the system for integration as a counselor-facing web tool to flag at-risk students early.
- Research presented at an international conference (ICETGBEAS, April 2026) — see Publications section.

Phishing Website Detection via URL Analysis [Mini Project]Bangalore · Sep 2024

- Trained a Random Forest classifier in Python (scikit-learn) to detect phishing URLs with high accuracy.
- Engineered features from URL structure (length, subdomain depth, special characters) using Pandas.
- Evaluated with precision, recall, F1-score, and confusion matrix; published findings in IJRPA.

POCSO Complaint Management System [Academic Project]Bangalore · 2024

- Built a full-stack web application with role-based portals for citizens, officers, and administrators.
- Developed backend in PHP with MySQL; implemented complaint tracking, status updates, and access control.
- Designed and normalized the database schema to support multi-role workflows and audit trails.

Income Tax Registration Form [Academic Project]Bangalore · 2024

- Designed a responsive, multi-field HTML/CSS/PHP form with server-side input validation.
- Focused on clean UX, field-level error handling, and cross-browser compatibility.

RESEARCH & PUBLICATIONS

Conference Paper — ICETGBEAS 2026 · April 2026

International Conference on Emerging Trends in Green Engineering, Business Excellence and Applied Sciences

- Presented: "AI-Driven Context-Aware Machine Learning Approach for Early Detection of Student Burnout and Mental Health Prediction"
- Delivered a full oral presentation at an international-level conference as a pre-final year undergraduate.

Journal Paper — IJRPA · 2025

International Journal of Research Publication and Reviews

- Published peer-reviewed research on phishing website detection. DOI: <https://doi-doi.org/101555/ijrpa.3339>

CERTIFICATIONS

Generative AI Literacy: NASSCOM

Digital Application Fundamentals: NASSCOM

Introduction to Cybersecurity: Infosys Springboard

Fundamentals of Information Security: Infosys Springboard

Fundamentals of Cryptography: Infosys Springboard

Project Management: Simplilearn

ACHIEVEMENTS & ACTIVITIES

- Presented research paper at ICETGBEAS 2026 (international conference) as a pre-final year undergraduate.
- Published peer-reviewed paper in IJRPA — two research outputs before graduation is highly uncommon.
- Smart India Hackathon Participant — national-level hackathon with 1M+ student participants across India.
- SAP Hackfest Participant — enterprise technology innovation competition organized by SAP.
